
Domestic and Family Violence Database Global Summary April - June 2007

The following statistical information has been collated from data provided by domestic and family violence prevention and support services funded by the Queensland Government's Department of Communities. The data is collected by the service providers in respect of each new client, or new client matter presenting for assistance in relation to domestic or family violence. Therefore, it does not accurately reflect numbers of individual people, and cannot be seen to represent the total workload of these services, because the data is collected only for *new clients* or *new client matters*. Furthermore, the data only relates to people who access support services and should not be seen to represent the incidence of domestic and family violence in Queensland. Charts have been provided where practical and useful.

NB: Percentages may be greater/less than 100 due to rounding and/or missing (not recorded) data
